

6 in 1 Blade Sharpener

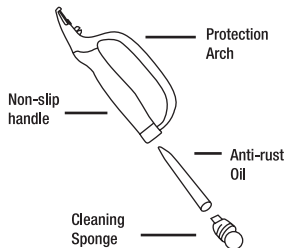

4 different sharpening methods, 1 cleaning sponge,
1 cleaning and lubricating oil = Total 6 in 1

1. Secure the tool to be sharpened either in vice, or else hold against a firm surface with the edge to be sharpened facing up

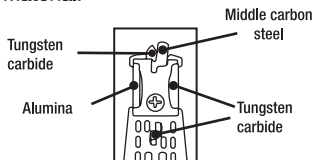

2. Select optimum sharpener based on icons printed on handle, and address blade as per relevant illustration below

3. Press down firmly and pull towards you, from one end of tool blade to the other. Usually 4 or 5 strokes sufficient

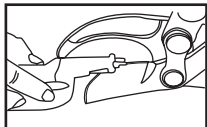

4. Cleaning sponge & anti rust oil provided to wipe down sharpening blade
